

# **Working Group 5 (WG5) Report from CSMAC Co-Liaisons**

# Status/Next Steps/Challenges

- ▶ Request to switch to industry-provided randomized real LTE net layout from grid.
  - Nulls ACTS analysis to date. New analysis expected by end Feb 2013.
- ▶ SWG assessment order for remaining systems: AMT, PGMs, SUAS – staggered delivery early March to May 2013.
- ▶ Continue WG5 Bi-weekly Meetings, as well as SWG and TWG Meetings as needed -- F2F & Telecons.
- ▶ WG5 consolidate/agree on conclusions drawn from SWGs in May 2013.
- ▶ Final WG 5 Report delivered by mid-June 2013.
- ▶ Information Handling Process for WG non-public releasable data/results (engagement between OSD, NTIA, FCC and WGs underway)
  - Support for NTIA and FCC as trusted agents
  - Ongoing discussions about specific roles/transparency to industry
  - USG needs to develop process for data releases.
- ▶ Compressed Schedule may limit additional phases for SWGs to refine assumptions / review analysis results, and thus impact final recommendations.
